

Municipal
Assessment
Agency Inc.

Collaborative Initiative Fund

What is this all about?

The Agency recently announced a Collaborative Initiative Fund. Municipalities considering new projects are encouraged to consider if the project might improve the assessments in their municipality. Some examples of projects that may be eligible:

- Aerial imagery
- GIS mapping
- Automated permitting systems
- Street view imagery

Municipal clients of the Agency can request a one-time grant of up to \$2 per assessed parcel to assist in funding an innovation that would enhance property assessment and valuation. The request must be made in writing to the Agency's CEO and outline how the proposed innovation would meet the fund's objectives. The Agency may request sharing of the data or suggest an enhancement that would make the project eligible for the grant. Questions on the fund and the grant process can be directed to the Agency's CEO, Sean Martin, at smartin@maa.ca.
